Find the missing side of the right triangle using the correct trig ratio (sin, cos, or tan).

Find the value of each trig ratio (sin, cos, and tan).

Find the midpoint of the segment with the given endpoints.

Find the distance between the points. Round to the nearest tenth if necessary.

Complete the statement using <, >, or =.

Use a number line to order the numbers from least to greatest.

Approximate the square root in fraction form. (No Calculators)

Tell whether the number is rational or irrational.

Determine whether a triangle with the given side lengths is a right triangle.
